---

Sabrina,

I am about to complete addressing the comments to the ARR. I have changed the surface water backgrounds to reflect the changes made in the HRS scoring strategy (using the 5 location composite background). Would you like the same strategy used for the sediment, or should it be left as is, since the sediment is not going to be used for HRS evaluation?

When I complete the changes I will email you a copy of the text to look over before we finalize the report.

I am out of the office all week, so the best way to get me is probably email.

Regards,

Megan J. Adamczyk
